Education

Chhattisgarh Swami Vivekanand Technical University

Aug. 2011 – Aug 2015

Bachelor of Engineering

Bhilai, Chhattisgarh

Technical Skills

Programming Languages: Java 8/11/17/21, JavaScript, HTML/CSS

Databases: NoSQL- Cassandra, SQL- MySQL

Developer Tools: IntelliJ IDEA, STS, Eclipse, Postman, Flow, ChatGPT, Prompt Engineering, GraphQL, Powershell

Technologies/Frameworks: Microservice, Modular monoliths Monolith Architecture, Design Patterns, REST, GraphQL, Spring Boot, Batch, Security, Spring Cloud Gateway, Spring Data JPA, Spring AI, Validations, Eureka, Docker, ElasticSearch, DataDog, SumoLogic, Wavefront, OpsGenie, Confluent, Apache Flink, Apache Kafka, Hibernate, PCF, Jenkins, Kubernetes, GitHub, JUnit, Mockito, GitLab, JIRA, BitBucket, TeamCity, IBM ODM, Maven

Experience

Healimpilo

April 2024—Present

Senior Software Engineer

Remote, Bengaluru, KA

- Led the migration of Kafka services from on-premises to Google Cloud Platform (GCP), improving performance by decoupling Kafka and the database.
- Implemented a Circuit Breaker to reduce logging costs and mitigate errors caused by frequent calls to a downstream external service that was down during peak hours, and created a custom annotation for Circuit Breakers that can be used company-wide to ensure predefined configurations are set automatically.
- Developed search functionality using Elasticsearch to enable message filtering based on subject and body keywords.
- Managed system monitoring using Sumo Logic, Datadog, and Wavefront. Served as the on-call engineer, handling Opsgenie alerts and optimizing alert configurations to minimize customer impact.
- Coordinated with cross-functional teams to align technical solutions. Created and managed Jira tickets for tracking development tasks. Led Scrum ceremonies, including daily standups and retrospectives.
- Mentored new joiners, helping them ramp up on projects and technologies.

Publicis Sapient

June 2022— April 2024

Senior Associate Platform L1

Remote, Gurgaon, HR

- Designed and developed multiple scalable microservices and APIs using Java 8, REST, and GraphQL adhering to Microservice Architecture principles.
- Engineered and deployed a high-performance Kafka-based system to track financial transactions, and compliance with industry regulations.
- Engineered the integration of cutting-edge design patterns including Circuit Breaker, Saga choreography, and CQRS to fortify system resilience and fault tolerance, resulting in reduction in system downtime.
- Delivered performance improvements through various optimization techniques.
- Maintained high code quality with unit test coverage exceeding 90% and actively addressed code issues using SonarQube.

Mphasis Ltd.

March 2021—June 2022

Senior Software Engineer

Remote, Pune, MH

- Extensive experience in working with scalable microservices, monoliths, and modular monolith architectures.
- Developed and maintained Spring Boot REST microservices with comprehensive unit, integration, and performance tests, facilitating bi-weekly deployments.
- Configured Tyk API management tool to enable request tracing and generate valuable analytics insights.
- Automated the build, testing, and reporting processes using TeamCity continuous integration for streamlined development workflows.
- Collaborated effectively with cross-functional teams to address bugs, implement features, and maintain the codebase.
- Documented project specifications, testing methodologies, and technical manuals for knowledge transfer and future reference.

Brillio**September 2020—March 2021***Senior Engineer**Remote, Hyderabad, TG*

- Leveraged full-stack development skills (JavaScript, jQuery, AJAX, HTML, CSS) to build user-centric web applications.
- Performed thorough software testing to identify and resolve bugs before application launch, ensuring a high-quality user experience.
- Developed innovative Proof-of-Concepts (POCs) utilizing Kendo UI to explore potential solutions.
- Maintained a focus on code quality by adhering to clean coding practices and best practices.

TechMahindra Ltd.**February 2017— September 2020***Software Engineer**Hybrid, Nagpur, MH*

- Delivered 10+ modules for the Supply Chain Management System, leveraging Test-Driven Development (TDD) and Agile methodologies for efficient development cycles.
- Optimized a legacy system's processing time from 24+ hours to minutes for handling 10 million+ records, utilizing the Executor framework and microservices architecture.
- Implemented service-oriented architecture (SOA) and web services for enhanced functionality.
- Collaborated effectively with team members using Git version control for efficient code organization and task management.
